CERTIFICATIONS

- **Inspire MANAK 2021 – STATE** level Award Winner (₹10,000 cash award.)
- **White Hat Jr** Developer Award – 2022.
- Online Certification for Mars Rover development – 2022.
- Hacker Rank Certificates.
- Anokha – 2026 Workshop Certificate

SKILLS

- Python
- C
- C++
- Embedded C
- Assembly Language
- Bash
- JavaScript
- MySQL
- Flowgorithm
- Keil µVision 4
- Micro controllers
- Flight controllers

NIKKIL PRITHVIN R.R

UNIVERSITY STUDENT – 2ND YEAR

EDUCATION

- **Amrita Vishwa Vidyapeetham, Coimbatore**
  Bachelor of Technology in **C**omputer and **C**ommunication **E**ngineering.
- **Mount Litera Zee School, Tirupur**
  Completed 12 Grade with 70.2% in 2025.
- **Paavai Vidhyashram CBSE School, Namakkal**
  Completed 10 Grade with 88.2% in 2023.

EXPERIENCE

- Joined the **Robotics Club of Amrita** and working on it actively.
- Successfully Completed **Drone Workshop** held at **IISC Bangalore**.
- Attended the **Handson Smart IoT Sensing and Cybersecurity** workshop held at Anokha (2026).
- Student council member at **Institute Innovation Council (IIC)**.

Internships

- **1st Year** – **One month** full-time internship at **Fuselage Innovations Pvt Ltd.**, Kochi, Kerala . Worked on **drone assembly, flight controller setup and testing**, gaining hands-on exposure to real-time UAV systems and troubleshooting.

SUCCESSFUL PROJECTS

1. Smart Agriculture Watering System

Developed Smart Agriculture Watering System using **Nodemcu-esp8266, relay,** submersible water pump, jumping wires, electric solenoid value, overhead tank, drip irrigation kit, etc. State Level Award winner in **INSPIRE MANAK** Award 2021, conducted for students of class 6–10 of age group 10–15 years, where **1 million** ideas were scouted by the Department of Science & Technology with the National Innovation Fund (NIF). I was selected out of those **1 lakh** students and was awarded with ₹10,000 prize amount, to develop prototype exhibitions for National Level Selection. (**INSPIRE** – **IN**novation in **S**cience **P**ursuit for **I**nspired **RE**search, **MANAK** – **M**illion Minds **A**ugmenting **N**ational **A**spirations and **K**nowledge). Click YouTube Channel for the entire project video.

2. AI-Powered Threat Intelligence Dashboard

Developed a web-based Threat Intelligence Platform integrating GPT-4 to analyze and summarize cybersecurity threat data from multiple sources, including security blogs and news sites. The platform leverages web scraping and Natural Language Processing (NLP) to provide actionable insights, enabling to proactively defend against emerging threats. Implemented using Python, Flask, Beautiful Soup, and Open AI API.
